

AUTUMN SITE 2005 PHASE 2

After a month of clearing the site, the 6th of August saw the start of the excavation.

This is trench 1 and only 5 centimetres down. Colin and Rene didn't know what was coming next.....

RUBBLE!!!!

Demolition rubble, and there was a lot of it.

As you can see from this picture; under the top soil the thick layer of demolition rubble. Followed by a layer of clay in which we found sherds of Victorian, Medieval and Roman pottery.

(Left) Pot rim from trench 1 of Roman Black burnished Ware (Right) Medieval Winchester ware

It's been a really exciting dig so far, there has been quite a lot of finds from different periods in time....

Is this the foundations that we have been looking for?

For an update keep looking in on this page. If you would like to participate in the excavation contact Pip.
